PROJECT STATUS

International Projects completed: 35

Countries Done: USA, Sweden, UK, Singapore, Australia, France etc.

Domestic Projects Completed   : 60

Solutions Projects

POS – Jewelry, Fashion, Retail

Technologies used: Laravel, Mysql, AJAX, Javascript, Jquery

POS – Machine integration: (Working in Progress)

Technologies: Python, Django, java Script , Django admin tools

Warehouse Management: Anaconda, Spyder django

Material Traceability: Warehouse SCM

ARTIFICIAL INTELLIGENCE

Worked on Data Preprocessing for data scaling and data accuracy, used logistic regression models

Working on Client Website using AI to reach more audiences, whereever they are with dialogflow Client - Nexgen cloud inc.

MACHINE LEARNING

AI for Manufacturing

AI with incredibly high-resolution cameras

Implemented plant automation Projects along with AI using high resolution camera, bar-code readers, RF rays and sensors for the clients like Addison etc..,

Chatterbot

Working on conversational dialog engine currently 80% of the requirement is Completed.
Technology : Python

SOME OF OUR PROJECTS

Automation Kanban

Replenishment Process
Client : Hyndai Glovis

Technology: Laravel, Mysql, .net on hand held device
JS query, JSON, JavaScript

AMARON Punching Process Automation

Client : Amara raja Batteries

PD : Application developed for tracking the batteries in formation process and finished batteries and assign Serial number using RFIDs and barcode scanners.
Technology: Phython with raspberry pi, MYSQL, HTML5, CSS3, JavaScript, JQuery, Ajax, Json, Laravel.

Material Traceability

Client name: Pennr Industries Ltd

Technology: Python

CAMA Apostalides : Digitalization of entire business process

Client: Design2 - UK

Technologies: Microsoft technologies

Raibuilders : CRM with Project Management

Client: Raibuilders Singapore

Technologies: Laravel, Javascript, Jquery, CSS, MYSQL etc

Middleware integration for Material request planning

Client : Farmland Foods – Kensas US-

Technologies: EDI, SAP ECC 6.0, ABAP – Shared resource

Serial Number processing – Rollout

Client : Electrolux - Sweden

Technologies : Python integration with SAP ECC6 ABAP 4.

Cetus Automation

Client: Cetus Automation, Singapore

Technologies: Laravel, Javascript, Jquery, CSS, MYSQL etc

Active Learners League

Client: Active Learners- Suwanee, GA

Technology: MYSQL, Laravel PHP framework, JavaScript, AWS, DEVOPS
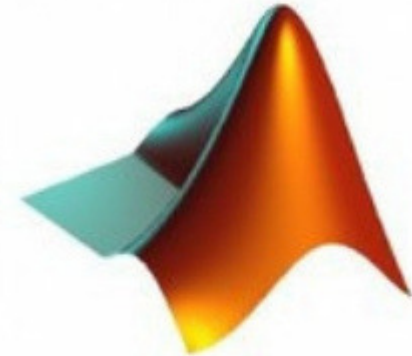

Alstom Parent – child serial Numbering

Client: Alstom

Technology: Python, Laravel, Mysql, JavaScript etc
